Professional Experience

Backend Developer **Mar 2025 – Present**
Tata Consultancy Services (TCS), Hyderabad

- Engineered **10+ production-grade RESTful APIs** using Spring Boot and Spring MVC, improving request-handling throughput by **30%** and reducing average response latency.
- Optimized **20+ complex SQL queries** on MySQL and Oracle through indexing and query rewriting, cutting average database response time by **25%**.
- Built and maintained **5+ backend modules** using Spring Data JPA and Hibernate ORM for reliable, scalable CRUD operations across relational data models.
- Reduced API defect count by **40%** through end-to-end Postman testing; resolved **30+ backend defects**, improving application uptime by **15%**.
- Collaborated in Agile Scrum sprints, delivering on schedule while following code review and SDLC best practices.

Software Engineer Intern **Oct 2024 – Feb 2025**
ITP Software India Limited, Hyderabad

- Built backend features using PHP/CodeIgniter (MVC), improving workflow reliability by **20%**; implemented secure session-based authentication, reducing data access issues by **20%**.
- Developed **10+ reusable backend components**, cutting future development effort by **15%**, using Git version control and code reviews.
- Actively participated in peer and code reviews, applying feedback to improve code quality, readability, and adherence to team standards.

Java Backend Intern **Jan 2024 – May 2024**
Triarights Solutions LLP, Remote

- Learnt backend features using Core Java, JDBC, and MySQL; participated in all SDLC phases from requirement analysis through deployment using Git.

Projects

NorthBound – SaaS Project Management Dashboard [GitHub] | [Live Demo]
JavaScript (ES6), HTML5, CSS3, Supabase, PostgreSQL

- Built a **role-based dashboard** with separate Admin and User views, secure login/logout, session management, and protected routes using Supabase Authentication.
- Implemented project CRUD with categories, status and deadline tracking, plus goals, an activity timeline, and global search, backed by a PostgreSQL schema created through SQL scripts.
- Designed a responsive UI for desktop, tablet, and mobile, and deployed the application on Netlify.

Employee Leave Management System [GitHub]
Java, JDBC, MySQL, SQL , Springboot , RESTApis

- Designed a normalized relational schema covering employees, leave types, requests, approvals, salary, and attendance workflows.
- Built leave request, approval workflow, and salary calculation modules using JDBC while maintaining transactional integrity.
- Wrote **15+ optimized SQL queries** for reporting and salary summaries using joins, indexing, and relational mappings.
